

This Project is within the scope of the Black Sea Highway. The aim of the Project is to provide a more comfortable traffic flow between Ünye and Piraziz, as well as facilitating a secure transportation system and an easy routing for agricultural and industrial transport. The Construction of the Ünye - Piraziz Highway, which is located within the boundaries of the Samsun Regional Highway Directorate, consists of two sections: the first section is between chainage 81+600 and 158+600 and the second section is between chainage 33+500 and 37+781. There are eight bridges with a total length of 320 meters and 23 grade crossings within the total 80-km length of the highway. The scope of work includes widening of 42km highway to 2x2 lanes and rehabilitation of the existing 32 km highway.
